

Red Crescent and its effect on the geography security on eastern borders (comparative study of social abnormalities during 1383-89)

Shahbahrami, F.¹, Ezati, E.²

Abstract:

Objective: drugs have some multidimensional effects on people and their lives. People who live in eastern provinces are at the risk of getting addicted and abnormal. Afghanistan is and has been the main problem for Iran. **Method:** this research has been done by library method and for this many books and articles have been read. The determined time was about 6 years. **Findings:** drugs have direct effects on life of people. Border cities are under the unkind effects of drugs and its relevant things. **Conclusion:** authorities must pay too much attention to drugs and eastern provinces.

Keywords: security geography, eastern borders, social
